

eduroSafe

Managed Firewall

Need real-time security monitoring and management, but at a fraction of the cost of traditional solutions? **Get eduroSafe and relax.**

Today's IT environment presents challenges to businesses that require a high degree of network security. eduroSafe's monitored and managed firewall service is configured to allow "good" traffic in and keep "bad" traffic out—with 24/7 proactive administration of your firewall infrastructure.

Managed Updates

eduroSafe firewalls are updated continuously to support changing business requirements including new VPN users, employee status changes and new partners and applications.

Ongoing Site Assessments

eduroSafe takes the worry out of site maintenance, including system patches, upgrades and security content updates.

Enhanced Security Monitoring

Certified security experts perform all activities necessary to keep your business devices operating at peak performance with comprehensive reporting and emergency response.

Proactive Cost Savings

eduroSafe reduces staffing requirements, training, maintenance and infrastructure costs for a lower total cost of ownership.

Easy Installation

eduroSafe provides firewall policy design and equipment installation with customized configuration to your office needs.
