

eduroVault

Remote Data Storage

Avoid a fatal crash with an automatic backup service that restores your data - and your confidence.

Ensure your valuable data is protected at all times with eduroVault's automatic offsite backup service. eduroVault lets you "set it and forget it."

Reduce Backup Costs

eduroVault eliminates the cost of a conventional backup system and doesn't require employee time to rotate media, clean drives, or replace media.

Automate The Backup Process

eduroVault performs backups automatically on a schedule you set—typically every night after the office closes.

Provide Documented Reliability

Backup logs can be automatically printed or emailed to a designated person when the backup is complete. Backed-up files are always available for instant recovery.

Access Previous File Versions

One month of previous file versions is stored by the backup system for instant retrieval through backup client software.

Secure And Protect Your Stored Data

All backed-up data is encrypted with AES algorithms before it leaves your office. Data is securely stored in multiple locations on dedicated, high-end servers.

Ensure Compliance

eduroVault's backup service can help your company comply with regulations such as HIPAA, Sarbanes-Oxley, and Gramm-Leach-Bliley.
