Integrated Voice

## Need savings without changing your existing phones? The answer is Integrated Voice.

eduroVoice Integrated Voice delivers business-class voice services using your high-speed internet connection and an internet access device (IAD). You get all the benefits of VoIP without replacing your existing PBX/key system or your existing phones.

### Turnkey Convenience

Use the same calling features you're accustomed to without having to learn a new interface and new access codes.

### No New Equipment or Upgrades Needed

Keep your existing equipment and phone numbers while utilizing existing data connections.

### Multiple Services

Access multiple services including local, long-distance, international, and toll-free calling—all over a single connection.

### Flexible & Cost Effective

Get significant cost savings on local voice access as well as data access. Lines can be added one at a time, supporting a pay-as-you-grow model to accommodate to all budgets.

### Low Maintenance

Eliminate the need to maintain separate voice and data networks by combining voice and digital traffic on a single connection.

---

### eduroVoice Benefits

eduroVoice Integrated Voice allows businesses the ability to lengthen the life of their current PBX or Key System, but gain all the savings and convenience of VoIP.

---

### Benefits Include

- No change to dialing or features
  - No new equipment
